LIST OF FIGURES

1.1. Typical traditional electron spectrometer

1.2. Typical traditional electron spectrum

1.3. Atypical traditional electron spectrum including "soft" electrons

1.4. “Attosecond microscope” electron/recoil-ion spectrometer

2.1. Scale rendering soft electron momentum imaging spectrometer

2.2. Experimental setup

2.3. Time of flight spectra for H_2 and He targets

2.4. Typical raw position spectrum of recoil-ion detector

2.5. Transverse electron momentum spectra for various electric fields

2.6. Comparison of longitudinal electron momentum with Tribedi *et al.*

2.7. Comparison of electron cross sections differential in angle with Tribedi *et al.*

3.1. Potential energy curves for neutral, singly and doubly ionized deuterium

3.2. Scale rendering of the electron/recoil-ion momentum spectrometer

3.3. Raw slices of recoil momentum for dissociated D_2

3.4. Fragment energy distribution for H_2 dissociation by Edwards *et al.*

3.5. Energy distribution for dissociated D_2

3.6. Distribution in angle for dissociated D_2

3.7. Density plots of electron z- and y- position/momentum from aligned D_2

3.8. Longitudinal momentum distributions and fits for zero momentum/position calibration

3.9. Tribedi data converted to polar representation

3.10. Polar plots of electron spectra for aligned molecules at various electron energies

3.11. Polar plots of electron spectra for photoionized molecules by Doerner *et al.*

4.1. Electron momentum spectra for low velocity projectiles by Abdallah *et al.*

4.2. Electron and recoil spectra for ultra-high velocity projectiles by Ullrich *et al.*

4.3. Recoil momentum spectrum for photoionized helium by Doerner *et al.*

4.4. Angular electron spectra demonstrating two-body/three body contributions by Stolterfoht *et al.*

4.5. Momentum spectra for 3.6 MeV/u Se^{28+} + He by Moshammer *et al.*

4.6. Present data placed perspective of beam velocity and binary encounter ridge

4.7. Spectrometer schematics and dimensions

4.8. Raw recoil detector and TAC_{eR} spectra

4.9. Raw electron detector and TAC_e spectra

4.10. P_{Rz} vs P_{ez} for 1 MeV H^+ projectiles

4.11. P_{Rz} vs P_{ez} for 1 MeV/u F^{9+} projectiles

4.12. Two dimensional plots of transverse recoil momentum for 1 MeV H^+, 5 MeV H^+, and 1 MeV/u F^{9+} projectiles

4.13. Two dimensional plot of transverse electron momentum for 1 MeV H^+ projectiles

4.14. Two dimensional plot of transverse electron momentum for 5 MeV H^+ projectiles

4.15. Two dimensional plot of transverse electron momentum for 1 MeV/u F^{9+} projectiles

4.16. One dimensional plots of transverse electron and recoil momentum for 1 MeV H^+, 5 MeV H^+, and 1 MeV/u F^{9+} projectiles

4.17. P_{Rx} vs P_{ex} and P_{Ry} vs P_{ey} for 5 MeV H^+ projectiles

4.18. P_{Rx} vs P_{ex} and P_{Ry} vs P_{ey} for 1 MeV H^+ projectiles

4.19. P_{Rx} vs P_{ex} and P_{Ry} vs P_{ey} for 1 MeV/u F^{9+} projectiles

4.20. Diagram of transverse momentum vectors and angles

4.21. Transverse angle distributions for 5 MeV H^+ projectiles

4.22. Transverse angle distributions for 1 MeV H^+ projectiles

4.23. Transverse angle distributions for 1 MeV/u F^{9+} projectiles

4.24. Correlated transverse projection plots for 5 MeV H^+ projectiles

4.25. Correlated transverse projection plots for 1 MeV H^+ projectiles

4.26. Correlated transverse projection plots for 1 MeV/u F^{9+} projectiles

4.27. Compiled ϕ_{PR} and ϕ_{eR} distributions

A.1. Spectrometer diagram and SIMION generated equipotentials

A.2. SIMION simulation of spatial focusing

A.3. Raw and gated detector images for capture calibration

A.4. Enlarged and projected gated position for capture calibration

A.5. Simulated error in P_{Rx} due to beam width

A.6. First principles simulation and fit of $P_{ex}(t)$ for 1 MeV H+ measurement

A.7. First principles simulation and fit of $P_{ex}(t)$ for 5 MeV H^+ measurement

A.8. First principles simulation and fit of $P_{ex}(t)$ for 1 MeV/u F^{9+} measurement

C.1. Picture of superconducting resonator in linear accelerator

C.2. Resonator field vs. time
